Fitting Instructions

YewdaleVitesse® Curtain tracks (7800W)

Safety Instructions:

1. Loops in pull cords, chains, tapes and inner cords that operate the product can cause strangulation
2. To avoid strangulation and entanglement, keep cords out of the reach of young children. Cords may become wrapped around a child's neck
3. Move beds, cots and furniture away from window covering cords
4. Do not tie cords together. Make sure cords do not twist and create a loop

7800W Cord Drawn Window Track:

1. Unpack the track and drill the centre of the track where suitable fixings can be obtained (maximum spacing 800mm and no more than 100mm in from either end).
2. Lift the track into place and fix it through the fixing holes in the centre of the track using the appropriate screws.
3. If the track has a join in place install this before lifting track into place. A second person would normally be needed should a join be used within the track.
4. Once the track is installed a fixing should be put through the fixing ring on each of the pulleys if top fixed.
5. Check the track operates smoothly and correctly before hanging the curtains.

NB. Large curtain tracks are heavy and it is important that the correct fixings are used. If you are unsure, seek expert advice.

6. Ensure child safety device is used. The cord tidy should be at a maximum distance from the control mechanism, keeping the loop taut (not under excessive tension however as this could negatively affect the longevity and operation of the track). Put the retaining device on the wall, mark fixing holes with a pencil, drill the holes and screw the device to the wall with suitable fixings.
