6400W

Curtain Tracks

- 01** Unpack the track and fix the universal brackets or top fix bracket into place using the appropriate screws. (Screws must be pan head and if possible insert a washer). Brackets should be 100mm in from either end and spaced at no more than 600mm between.

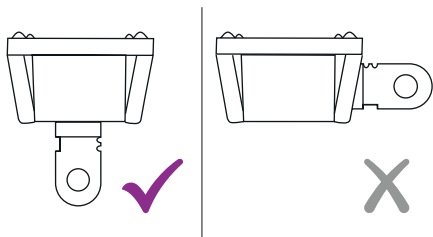

- 02** If the track has a join in place, install the connecting bridge before lifting track into place. A second person would normally be required if a join be used within the track.

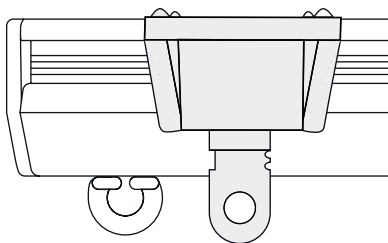

6400W Curtain Tracks

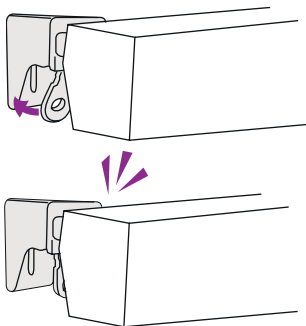

- 03** Ensure the locator is facing down on the bracket before lifting the track in place.

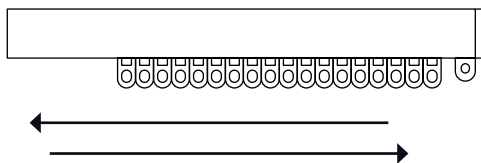

- 04** Lift the track into place, insert the lugs on the front of the bracket into the back of the track.

- 05** Once located, turn the locator into place to lock the track onto the brackets.

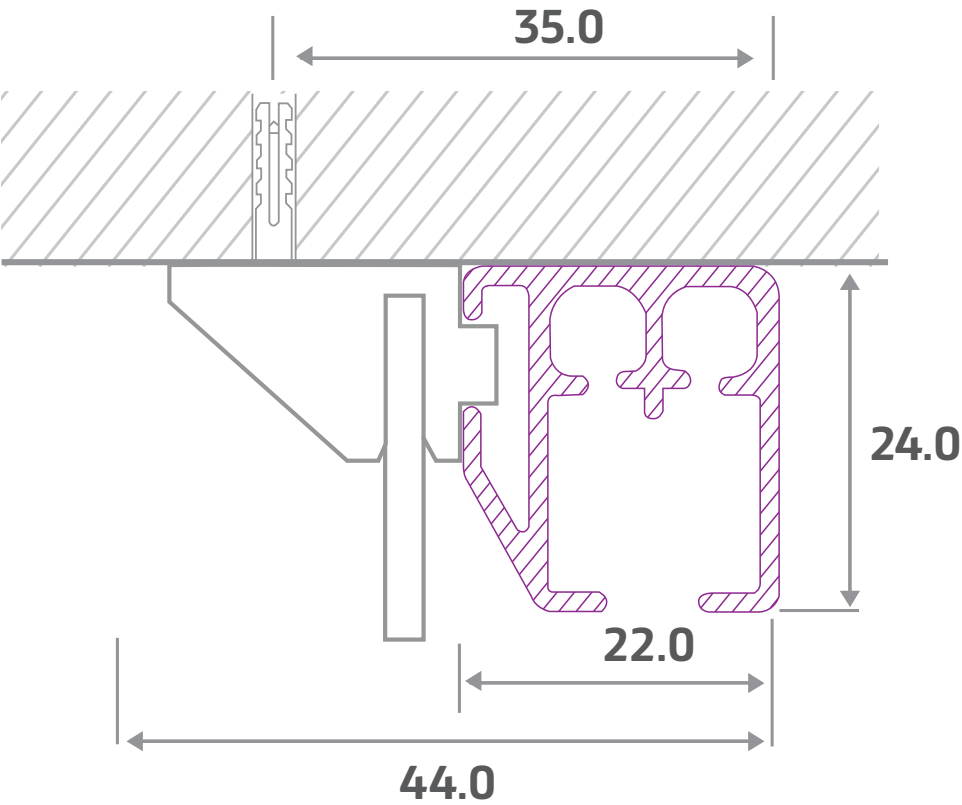

- 06** Check that the track operates smoothly and correctly before hanging curtains.

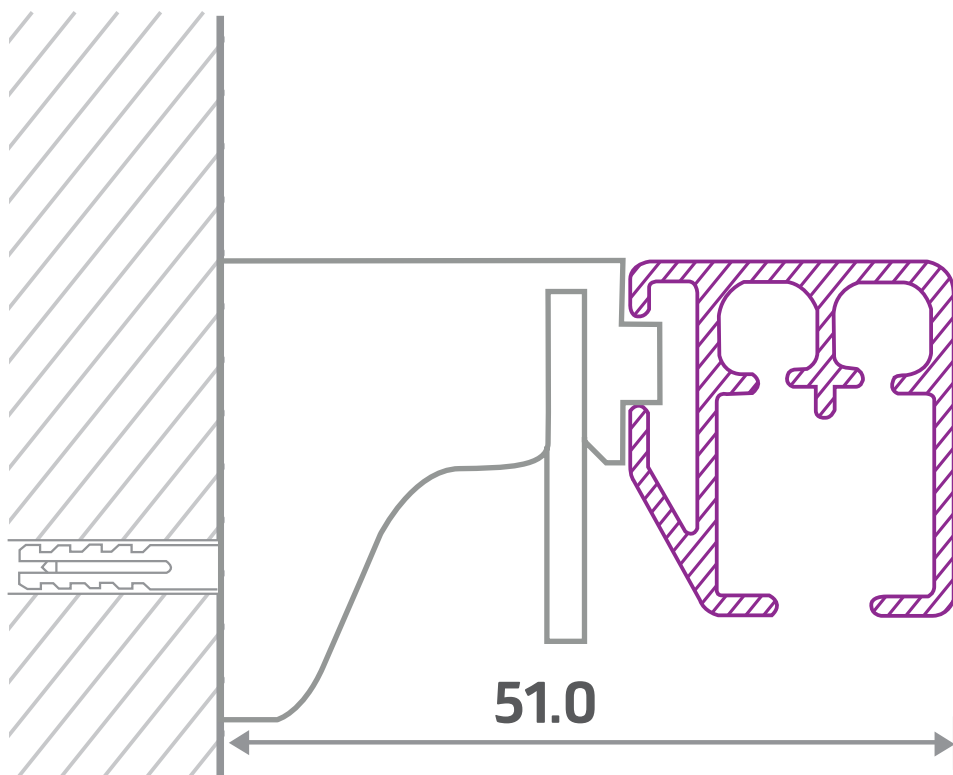

NB. Large curtain tracks are heavy and it is important that the correct fixings are used. If unsure, seek expert advice.
