

Official Notice from Yewdale

To Whom It May Concern,

We are formally addressing the recycling capabilities of our Tara fabric range, which is a critical part of Yewdale's commitment to environmental responsibility. Tara fabrics are manufactured from post-consumer recycled materials, specifically plastic bottles sourced from general waste streams and polluted oceans. **The Tara Dimout and Tara Blackout options contain 100% recycled polyester, while the Tara Screen fabric includes 85% recycled polyester and 15% non-recycled polyester.**

Importantly, the Tara fabric range can be recycled. However, it is essential that you verify with local recycling facilities to confirm their ability to handle these materials, as processing capacities vary.

Thank you for prioritising sustainable choices with Yewdale.

Sincerely,
The Yewdale Team

Yewdale, Enterprise Way, Wickford, Essex, SS11 8DH
