IV400 Medium Duty Intravenous Support Track

Features

The YewdaleMovatrack[®] IV400 medium duty intravenous support track is machined from rigid, high-grade aluminium profile section and can be mounted directly to the ceiling or, more usually, suspended at cubicle track height of 2.1m. This unique system is supplied as standard in hygienic, white powder-coated finish and utilises economical 2-point drip carriers with nylon runners. Able to span 2.5 metres without support, and includes all necessary fittings.

Benefits

The YewdaleMovatrack[®] IV400 was designed specifically for the overhead suspension of drip bags without the need to use valuable floor space. This means that it is always available at a moment's notice, yet remains

discreetly unobtrusive. As the carrier is track mounted, it can be moved to one side of the cubicle when not in use, and can be positioned at either side of the bed, or above it, if required. IV400 is very quick and simple to install. It is usually fixed to the existing cubicle curtain track using T-joints, and would only need extra suspension points where a long span is required. Each track is fitted with a press-slide carrier access point to enable extra carriers to be added at any time. The 2-point carriers run on low friction nylon runners in a channel within the track section and have two stainless steel hooks for drip bags, with a load capacity of 3kg per hook.

IV Mobile

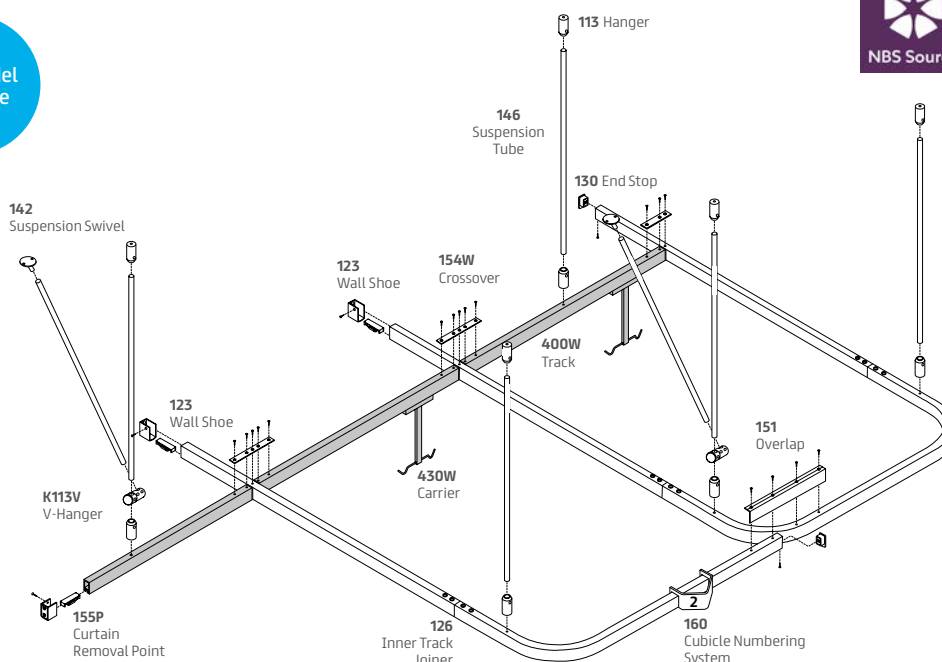

The YewdaleMovatrack[®] IV400 system in conjunction with the YewdaleMovatrack[®] 101 mobile cubicle track system is a unique

combination, giving full IV provision at any point within the cubicle. The traversing IV track is fitted with mobile trolleys at each end which run within the special front and back tracks of the cubicle track system. For more details on YewdaleMovatrack[®] Mobile 101 see page 6.

Specification

The YewdaleMovatrack[®] IV400 Overhead intravenous track systems as manufactured by Yewdale, +44 (0)1268 570900. Extruded aluminium track with white powder-coated finish to be suspended (at 2.1m above floor level or as specified) in accordance with manufacturer's instructions. 2-point carriers to be suspended from track on nylon runners. Layout as shown on accompanying drawings.
