VN25 & VN25S

Our amazing collection of YewdaleDefiant® Venetian blinds and accessories has been regenerated to include new mechanisms, higher quality materials and in a range of stunning colours.

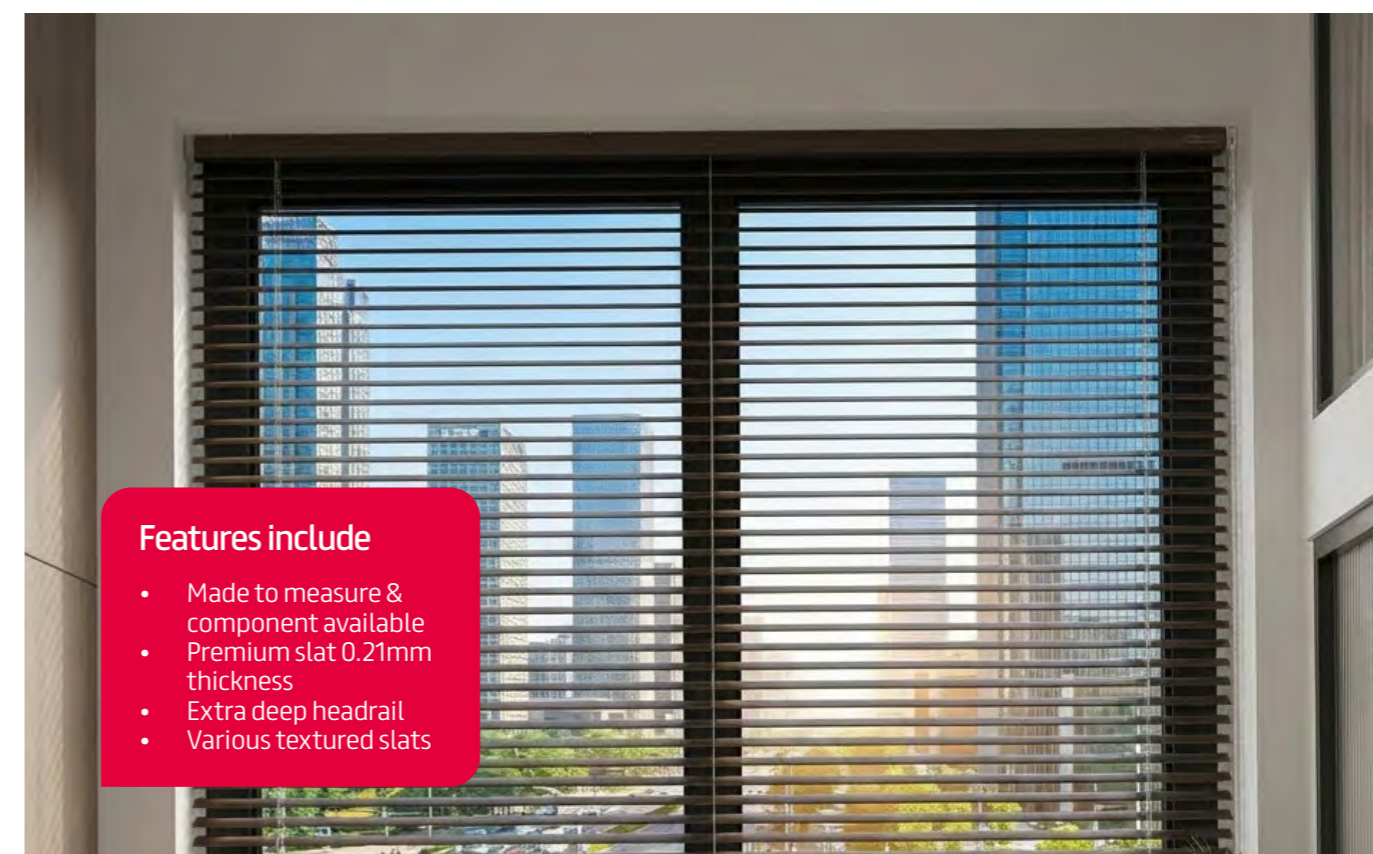

YewdaleDefiant® VN25 Venetian blinds are a simple, stylish, traditional sun shading solution for an extensive range of surroundings with a colour to co-ordinate every interior.

## The VN25 System

The YewdaleDefiant® VN25 system is available in component and made to measure formats. With the traditional mechanisms of tilt wand and cord, this system is suitable for a vast array of different environments and surroundings.

There is an impressive collection of 25mm slats with a premium 0.21mm thickness in a vast spectrum of colours. Colour slats are available in a range of finishes including; smooth, brushed, matt, wood textured, silky gloss, sparkle and high shine to suit all types of interior design.

The headrail features extra depth to accommodate wider installations and requires minimal brackets, for an easier fit. All YewdaleDefiant® VN25 systems have colour co-ordinating headrails, bottom bars, cords and ladders to compliment the finished blind.

YewdaleDefiant® VN25S Venetian blinds are a unique, simple, stylish, sun shading solution for an extensive range of surroundings with a colour to co-ordinate every interior.

## The VN25S System

The YewdaleDefiant® VN25S system features a unique mono chain control. This system incorporates all of the same extensive options of the YewdaleDefiant® VN25 including; the impressive collection of 25mm slats with a premium 0.21mm thickness in a vast spectrum of colours and textures, the extra depth headrail that can accommodate wider installations and requires less brackets, and colour co-ordinating headrails, bottom bars, cords and ladders.

The main benefit of the VN25S unique mono chain control is there's only one mechanism required for the whole system. Therefore the blind is easily operated from one end giving a neater appearance overall. This innovative mechanism ensures the blind constantly stays level when lifted and slats can be angled more accurately.

Available in component and made to measure formats.

### Features include

- Unique mono chain control
- Premium slat 0.21mm thickness
- Extra deep headrail
- Various textured slats
