YewdaleHarrier® Disposable Curtains

yewdaleHarrier®
CUBICLE AND SHOWER CURTAINS

Disposable cubicle curtains

Infection control:

One of the most important aspects of the hospital environment is infection control. It is now a major factor in the assessment of a hospital's performance and rightly so, as any improvements in infection control can cause an immediate increase in the number of lives saved. And as the risk of infection is reduced, the quality of life for patients is enhanced.

YewdaleHarrier® disposable curtains should become an integral part of every hospital's overall infection control strategy. A programme of regular replacement can be supplemented by a policy of immediate change in any areas that have been exposed to high infection risk.

The curtains are manufactured from recyclable polypropylene and available with or without an impregnated anti-bacterial Biosafe formula. A self-auditing label allows for monitoring of the frequency of curtain changes in line with infection control policies. Test results are available on request.

Eco-friendly and recyclable:

YewdaleHarrier® disposable curtains have a unique patent-pending design, they have no plastic eyelet. Instead, they have a simple hook hollow which saves up to 100 grams of plastic waste per curtain and makes them 100% recyclable. With the curtains being produced in the UK and not overseas, the curtain's carbon footprint is dramatically reduced making them the ideal curtain for healthcare settings that are striving towards carbon neutral targets.

Safe and durable:

Flame-retardant to BS5867 Part 2 Type C and made from 110g lightweight polypropylene, YewdaleHarrier® disposable curtains are safe and tough. The fabric we use is actually up to 40% stronger than other disposable curtains on the market. We have rigorously tested the fabric quality and performance, and guarantee its durability under the harshest of environmental conditions. Test results are available on request.

Quick and easy fit:

Compatible with all types of track, our disposable curtains are supplied with hook hollows so you can fit the curtain quickly and easily onto any existing track glider or roller hook at any point on the track. If you require hooks, our reusable hooks are uniquely designed to stand upright for easy load and glide onto your existing track making curtain changing quick and easy.

Colours:

With a choice of 5 standard attractive colours and bespoke colours available on request, our wide range of disposable curtains will brighten up and compliment any ward décor or building design. Request our fabric selector for the exact details of our colours.

Sizes:

For bespoke requirements, we can produce disposable curtains to your exact width and height (including half sizes) and with optional tiebacks - just get in touch with your request.

CUBICLE AND SHOWER CURTAINS

Disposable cubicle curtains

Lightweight and easy to fit:

Designed to be regularly replaced, our disposable curtains are lightweight and easy to handle making them quick and easy to install onto any existing cubicle track gliders or roller hooks at any point on the track. They are easily a one-person install so no need to rely on additional help wasting vital time and resources.

Options:

Curtain tiebacks with hook and loop fastening are available for YewdaleHarrier® disposable curtains in all of our standard colours. The tiebacks hold the curtains in place when not in use and are made from the same anti-microbial material, helping control infection.

The simple hook hollow

The DPL5 YewdaleHarrier® disposable curtain comes as standard with hook hollows which allow for a quick and easy fit onto any existing cubicle track gliders or roller hooks at any point on the track.

The U hook for external hanging

The DPL7 YewdaleHarrier® disposable curtain comes with a U-shaped hook for quick removal and installation of disposable curtains which hang externally on the existing cubicle track

The stalk for an easy glide

The DPL6 YewdaleHarrier® disposable curtain comes with fitted reusable Harrier hooks with stalks which are uniquely designed with a shoulder on the hook so that they can stand upright for easy load and glide.
